## Scavenger

Total Oil Change System • Remove All The Oil

- The ONLY way to easily and effectively change all of the oil in many of today's American V-Twin motorcycle engines.
- As much as 24 oz. of dirty oil remains in the bottom of dry sump engines - mixing with clean oil as soon as the engine is restarted, shortening the life of your oil and engine.
- The Scavenger™ pulls this oil and the contaminants out, leaving you with a completely clear engine.
- Each Twin Cam A & Sportster® oil change requires the use of fitting for future Oil Scavenger uses (sold separately).
